

Freedom of Information Request – Carbon Savings

Date received – 17/03/23

Request & Response:

1. Whether you use similar technology in any swimming pools you own, fund or manage and if so any estimates you have of annual financial and carbon savings as a result.

The data centre at Exmouth linked to the Leisure Centre is the first of its type in the Country as such we do not have similar technology.

2. Whether you have any plans to use similar technology in any swimming pools you own, fund or manage and if so any estimates you have of annual financial and carbon savings you expect to achieve as a result.

We are reviewing the heat and power system that supplies Places Leisure Eastleigh and plan to make contact with Deep Green. At this stage we hold no information on financial/carbon savings from such systems.
